Isolation thermique contre la chaleur pour échangeurs à plaques et joints pour bâtis acier

Alfa Laval heating insulation is used to thermally insulate gasketed-plate-and-frame heat exchangers with operating temperatures up to 180°C (356°F). The insulation saves energy and provides protection against the heat of the plate pack. It also assures a dry and comfortable working climate in the operating room.

Applications
- Biotech and Pharmaceutical
- Chemicals
- Energy and Utilities
- Food and Beverages
- Home and Personal care
- HVAC and Refrigeration
- Machinery and Manufacturing
- Marine and Transportation
- Mining, Minerals and Pigments
- Pulp and Paper
- Semiconductor and Electronics
- Steel
- Water and Waste treatment

Benefits
- Saves energy
- Plate pack heat protection
- Easy to install

Design
Alfa Laval Heating insulation is available for most of the heat exchangers in the Industrial line and the Industrial semi-welded line. The heating insulation sections (panels) are designed to ensure simple assembly and disassembly. The panels are equipped with connecting spring locks in galvanized steel or fixed together using screws.
Approximate dimension
Measurements in mm (inch).
